PROFESSIONAL SUMMARY

Computer Science (AI&ML) graduate with over a year of object-oriented programming experience in Java and Python, and hands-on background building reliable, scalable backend systems and REST APIs. Strong foundation in data structures and algorithms, software engineering principles, and collaborative development practices, with a track record of applying new tools and methods to deliver maintainable, production-quality solutions.

INTERNSHIP EXPERIENCE

SmartBridge *Sep 2025 – Mar 2026 — virtual*

Artificial Intelligence & Machine Learning Intern

- Applied core engineering principles to design and build scalable, object-oriented Python applications, solving complex problems through sound, creative software engineering.
- Worked with cross-functional stakeholders to determine feature requirements, adopting Docker and Git-based workflows to incorporate new engineering methods into iterative development.
- Sought feedback and applied industry best practices to improve technical solutions, contributing to deployment workflows through rigorous debugging and iterative testing.
- Demonstrated strong time management by consistently meeting project milestones in a cooperative, deadline-driven team environment.

EDUCATION

Jawaharlal Nehru Technological University Kakinada *2022-2026*

B.Tech – Computer Science & Engineering (AI&ML)

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA), ServiceNow

ServiceNow Certified Application Developer (CAD), ServiceNow

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional, Oracle

HackerRank Certified: Problem Solving, Java

TECHNICAL SKILLS

Programming Languages: Java, Python, C
CS Fundamentals: Data Structures, Algorithms, Object-Oriented Design
Databases & SQL: PostgreSQL, MySQL, MongoDB, SQLite
Backend & APIs: FastAPI, REST APIs, WebSockets
AI/ML: Machine Learning, Computer Vision, FAISS, NLP, Vector Search
Tools & Platforms: Docker, Git, Linux, ServiceNow
Soft Skills: Problem Solving, Team Collaboration, Adaptability, Analytical Thinking

PROJECTS

Examynex – AI-Powered Online Examination & Proctoring System

- Built a scalable, object-oriented examination and proctoring platform using FastAPI and WebSockets, architected to support concurrent exam sessions with sound engineering practices for performance and reliability.
- Integrated structured logging and monitoring hooks to improve system observability, and designed a secure, maintainable PostgreSQL data layer for reliable storage and retrieval of exam and proctoring records.

SmartAssess – AI-Powered Assessment Recommendation System

- Engineered a recommendation platform using FAISS and Sentence Transformers, designed for low-latency, scalable vector similarity search across large embedding sets.
- Designed and documented FastAPI REST endpoints for recommendation retrieval and metadata management, prioritizing code clarity and maintainability.

ADDITIONAL INFORMATION

English (Fluent), Telugu (Fluent), Hindi (Fluent)
